

# NAVIGATION BAR WITH DROPDOWN

by  
c.jeya santhosh

# input

<> navigation.html X

<> navigation.html > html

```
1  <!DOCTYPE html>
2  <html>
3  <head>
4      <title>Navbar with Dropdown</title>
5      <style>
6          body {
7              margin: 0;
8              font-family: Arial, sans-serif;
9          }
10
11      /* Navbar */
12      .navbar {
13          background-color: #2c3e50;
14          overflow: hidden;
15      }
16
17      .navbar a {
18          float: left;
19          display: block;
20          color: white;
21          text-align: center;
22          padding: 14px 20px;
```

head>

body>

```
<div class="navbar">
    <a href="#">Home</a>
    <a href="#">About</a>

    <div class="dropdown">
        <button class="dropbtn">Services ▼</button>
        <div class="dropdown-content">
            <a href="#">Web Design</a>
            <a href="#">App Development</a>
            <a href="#">SEO</a>
        </div>
    </div>

    <a href="#">Contact</a>
</div>
```

## **: Introduction**

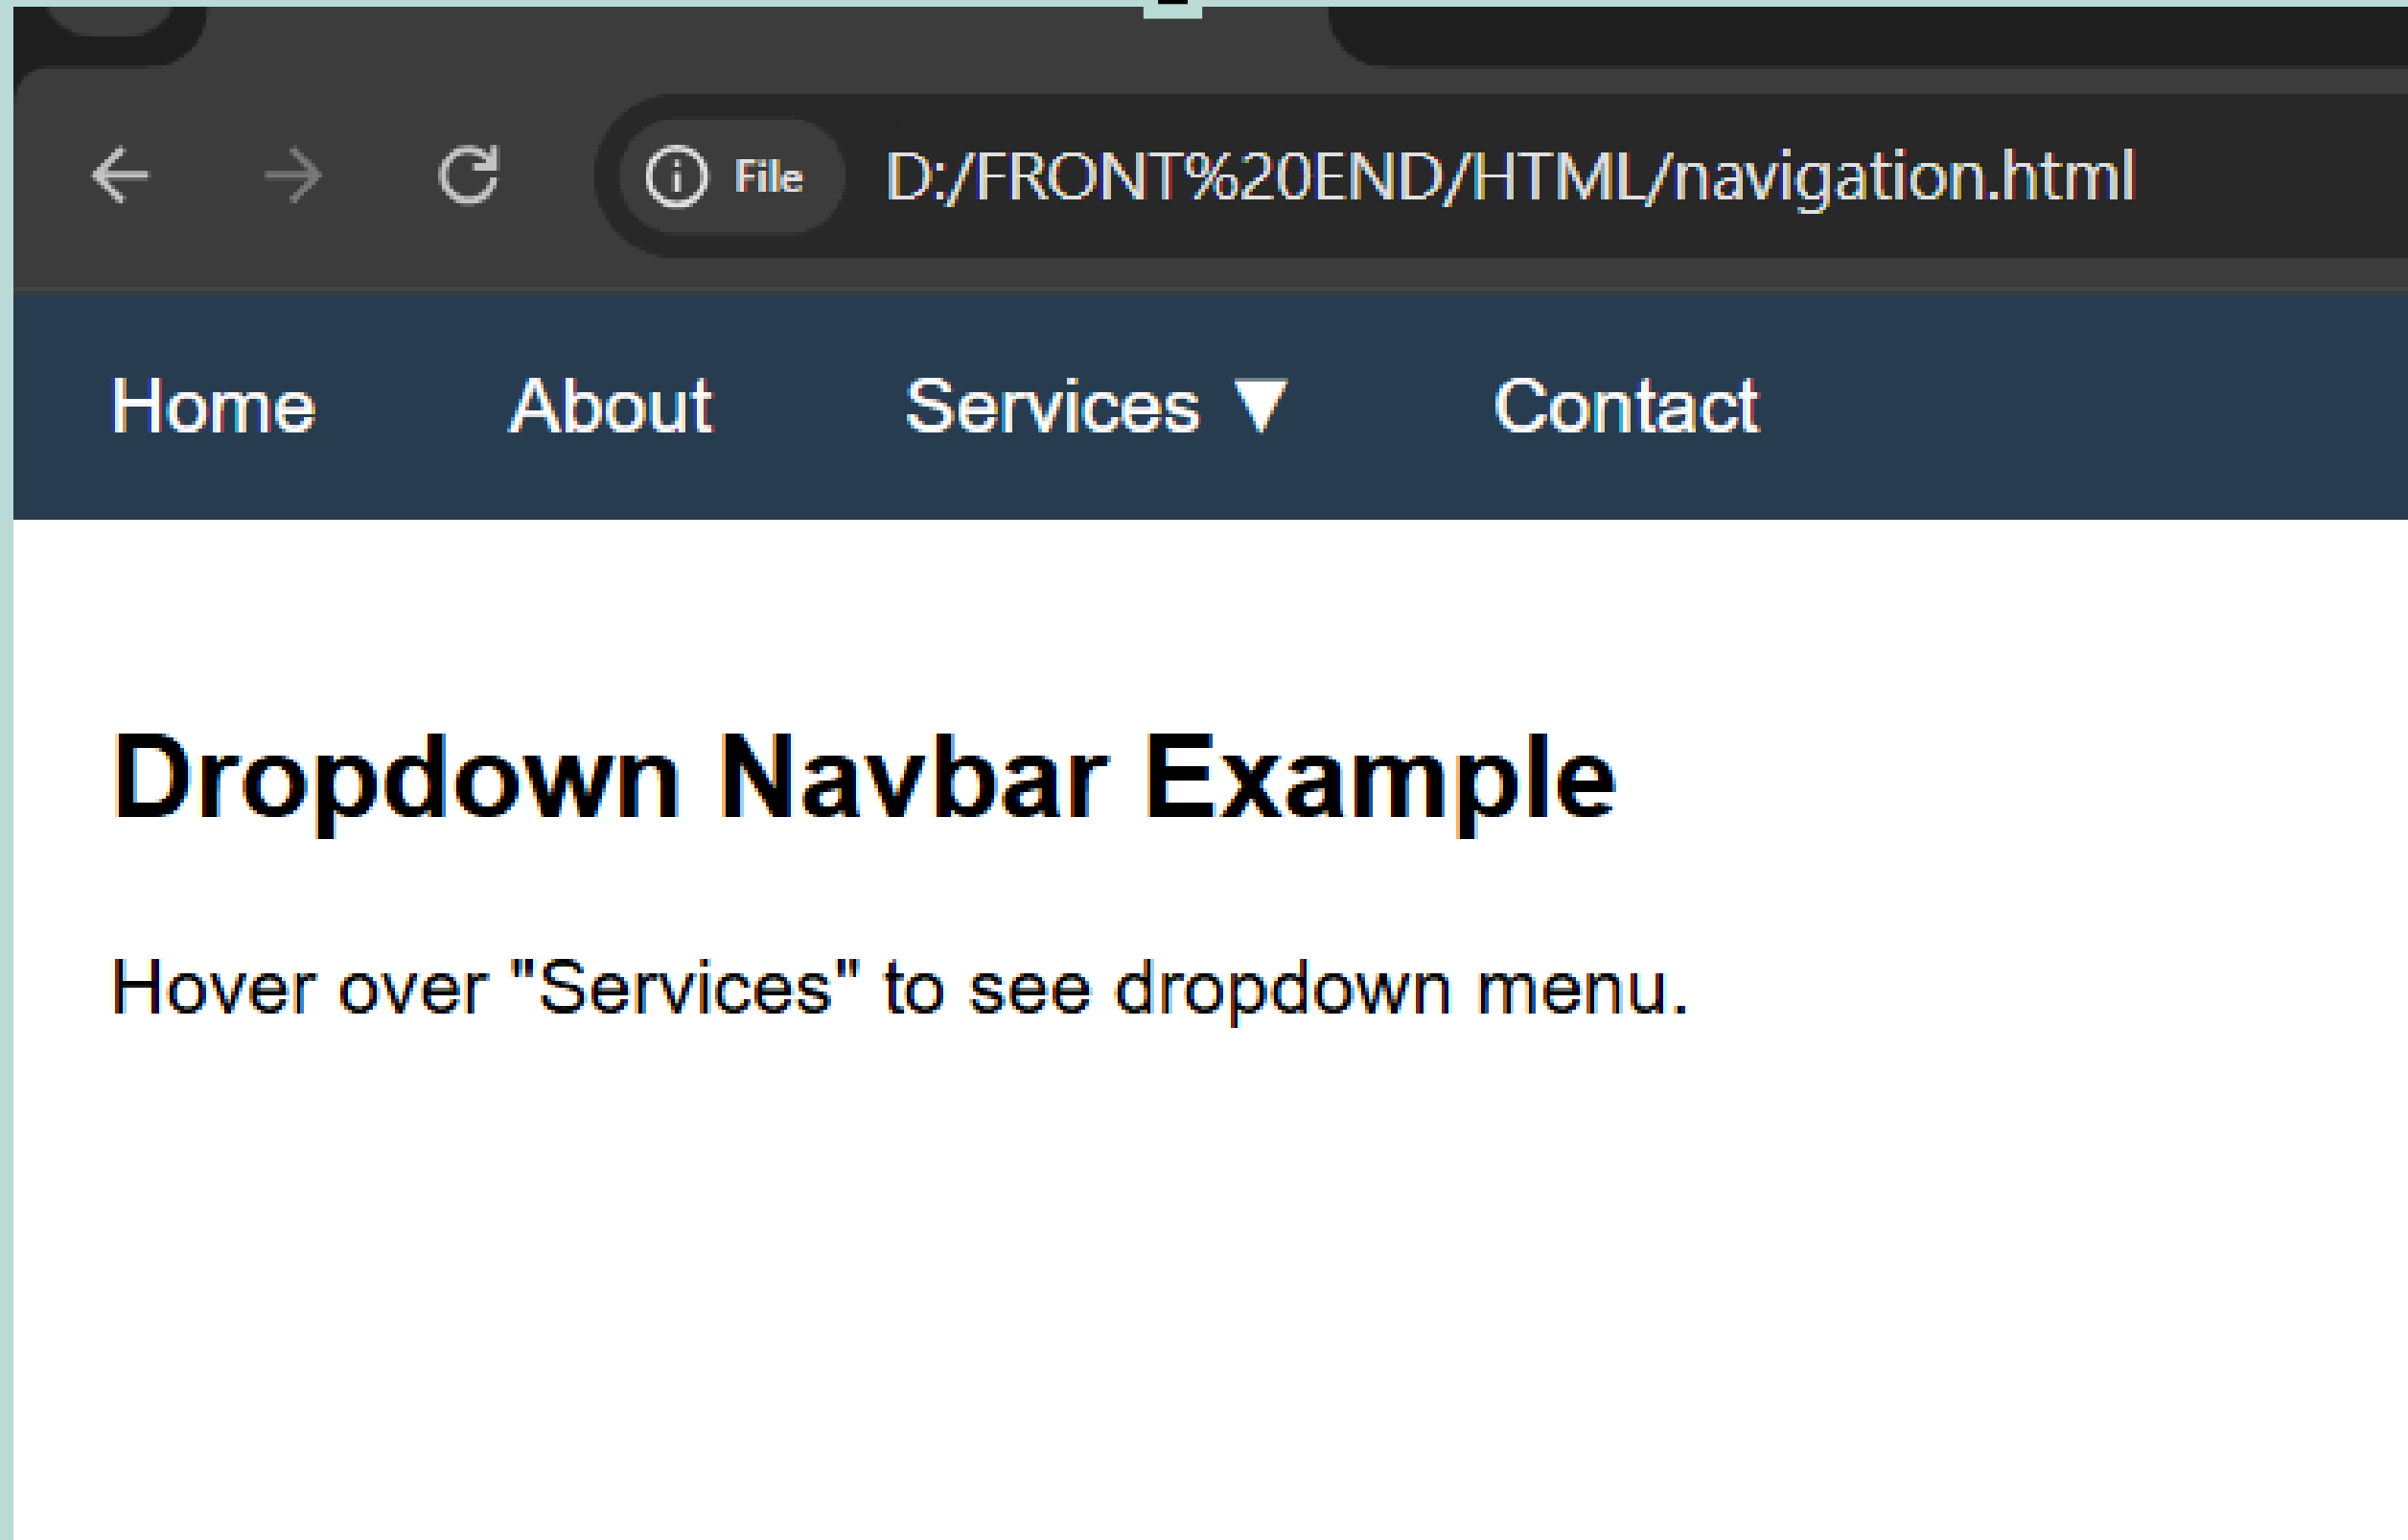

**A Navigation Bar is an important part of a website.**

**It helps users move between different pages easily.**

**A Dropdown Menu is a feature that shows additional options when the user hovers or clicks on a menu item.**

# output

## ● Slide 6: How It Works

- The dropdown content is hidden using:
  - `display: none;`
  - When the user hovers:
  - `display: block;`
  - CSS `:hover` selector is used to trigger the dropdown.
  - `position: absolute;` helps position the dropdown menu properly.
- 

Thank You
